

How to update the YOUNG MKIII with DFU

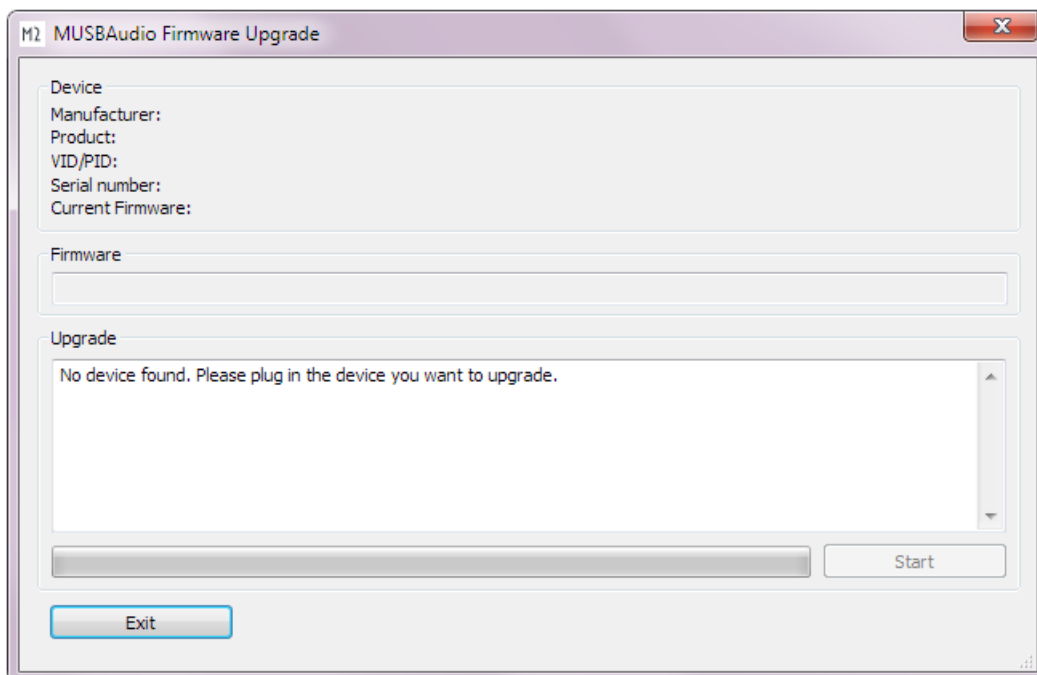

This document describes how to update the firmware on the YOUNG MKIII device with the DFU.

1. Unzip the file "*YoungMKIII_Update_r0x.xx.zip*"
2. Open the folder "*YoungMKIII_Update_r0x.xx*"

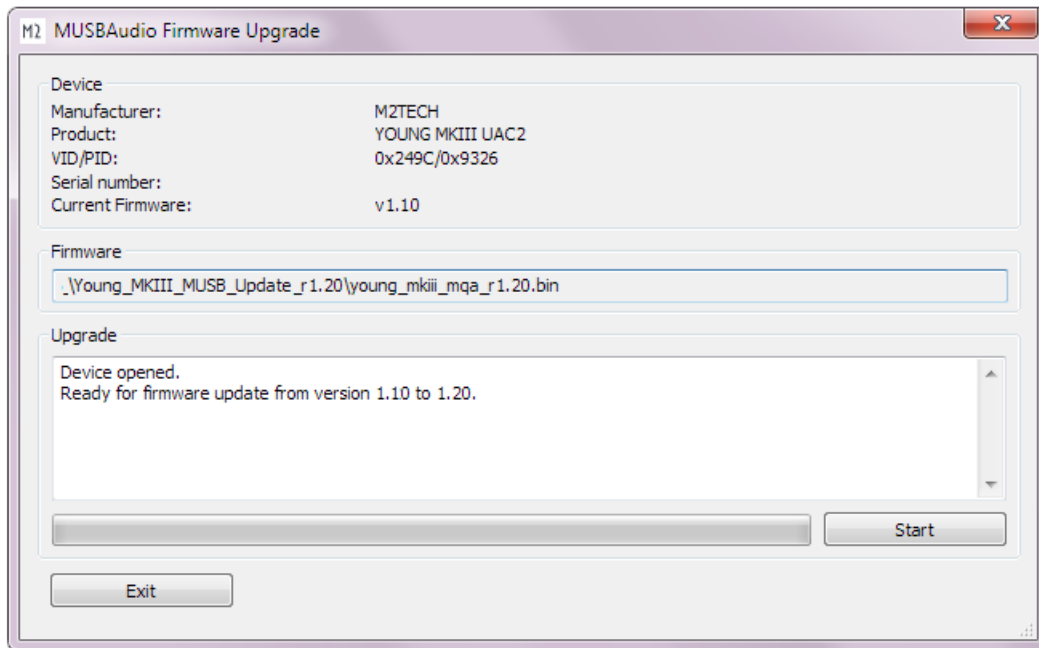

3. Start the program: **MUSBAudioDfu.exe**

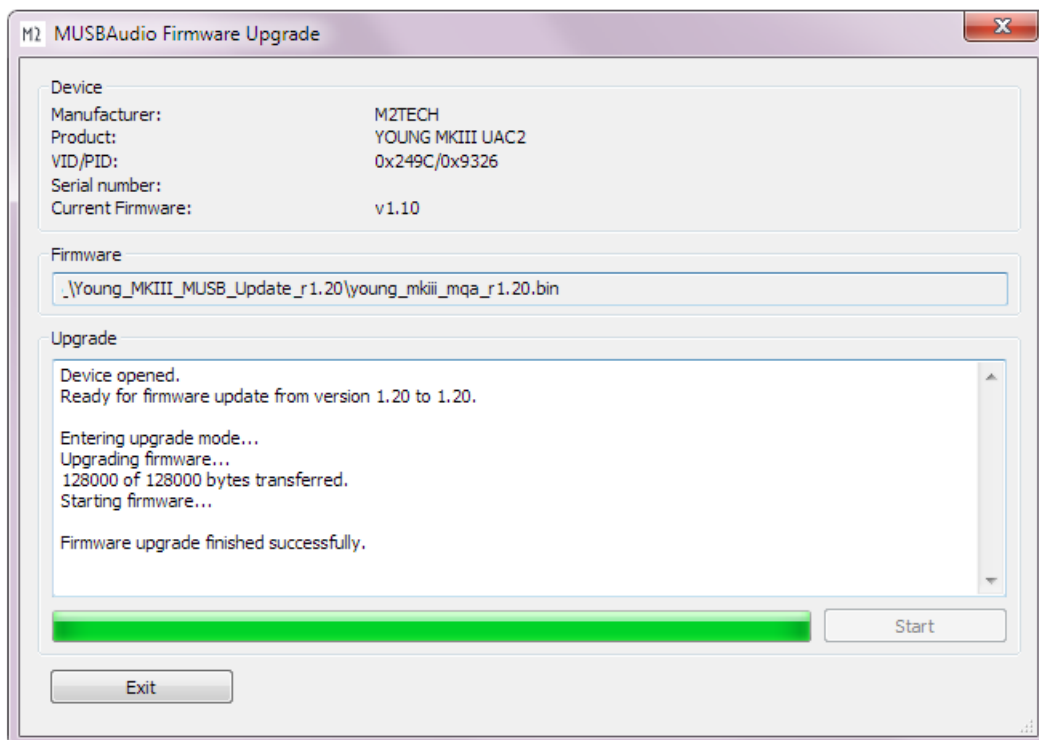

Below the Screenshot shows the main windows of MSUBAudioDfu.exe

4. Now you can connect the YOUNG MKIII to the USB port and the MSUBAudioDfu will show the Fw revision and the Product:

5. Click on "Start" button and when the update is finished check the firmware revision.

6. Unplug the USB Cable and plug it back.

7. Now the YOUNG MKIII was updated.

NOTE: If the unit will be not recognized then contact M2tech Technical Support.
